

Triangle Tag

Triangle Tag is a cooperative tag game. Divide your group into groups of four. Each group of four decides which person in the group will be the "tagger" and which person the tagger is going to try to tag (the "taggee"). The other two people are blockers. The taggee and the blockers face each other in a circle holding hands. The object is for the blockers to try to stay between the taggee and the tagger preventing the tagger from tagging the taggee without letting go of hands. If the tagger tags the taggee, the game stops, a new taggee and tagger are chosen, and the game resumes. If during the game anyone in the small three person circle lets go of hands, that is considered to be the same as a tag (as if the tagger actually did tag the taggee).
